GILL

Wind Speed & Direction Sensors

gill instrumnts.com
Gill Instruments has over twenty-five years experience in air flow measurement using ultrasonic technology and is a world leader in the field of wind measurement and weather monitoring. Gill offers the most extensive range of ultrasonic wind speed and direction sensors on the market today.

With headquarters in Lymington, UK, Gill supplies products globally, both directly and through an extensive network of distributors.
WindObserver
Wind Speed & Direction Sensors for Extreme Conditions

All WindObserver sensors have an IP66 rated stainless steel construction. WindObserver 65, 70 & 75 are available with a range of mounting and connection options, and WindObserver IS has approval for use in hazardous petrochemical environments.

WindObserver 65
WindObserver 65 will monitor wind speeds up to 65m/s (145mph) and provides data via digital and optional analogue outputs. This wind sensor is particularly suitable for use in land based and marine environments.

- **Wind Speed Range**: 65m/s (145mph)
- **Construction**: Stainless Steel
- **Operational Temp**: -55°C to +70°C
- **Weight**: 1.4kg (50oz)
- **Heating Option**: Standard Power
- **Environmental**: IP66
- **Analogue Option**: ±2.5V, 0.5V or 4-20mA

WindObserver 70
WindObserver 70 will monitor wind speeds up to 70m/s (157mph) and has been accepted for service by the FAA and CAA for reporting of surface wind in airport applications when supplied as part of a suitable AWOS*.

- **Wind Speed Range**: 70m/s (157mph)
- **Construction**: IP66 Rated Stainless Steel
- **Operational Temp**: -55°C to +70°C
- **Weight**: 1.4kg (50oz)
- **Heating Option**: High Power
- **Environmental**: IP66

WindObserver 75
WindObserver 75 will monitor wind speeds up to 75m/s (168mph) and features 150 Watts of electrical heating power in the anemometer head. This sensor has been designed for use in freezing weather conditions.

- **Wind Speed Range**: 75m/s (168mph)
- **Construction**: IP66 Rated Stainless Steel
- **Operational Temp**: -55°C to +70°C
- **Weight**: 1.4kg (50oz)
- **Heating Option**: High Power
- **Environmental**: IP66

WindObserver 90
WindObserver 90 will monitor wind speeds up to 90m/s (201mph) and features a high power de-icing system together with a robust heavy duty design. The wind sensor is designed for use in tropical cyclones and in high altitude applications.

- **Wind Speed Range**: 90m/s (201mph)
- **Construction**: IP66 Rated Stainless Steel
- **Operational Temp**: -55°C to +70°C
- **Weight**: 1.4kg (50oz)
- **Heating Option**: High Power
- **Environmental**: IP66

WindObserver IS
WindObserver IS carries Ex ia IIC T4 Ga and Ex ia IIIC T1 35°C Da IP66 certificates for ATEX and IECEx approvals for use in hazardous areas. This industrial anemometer will monitor wind speeds of 0-75m/s and is particularly suited to offshore oil platform applications. A choice of mains voltage (110 V/220 V) or DC voltage (12 Vdc) power supplies are available. Both units provide power to and receive wind data from WindObserver IS.

- **Wind Speed Range***: 75m/s (168mph)
- **Construction**: IP66 Rated Stainless Steel
- **Operational Temp**: -30°C to +70°C
- **Weight**: 1.6kg (57oz)
- **Heating Option**: None
- **Environmental**: IP66

*Automatic Weather Observing System.

*Anemometer only.
WindSonic and WindSonic M are low-cost ultrasonic wind speed & direction sensors, monitoring wind speeds up to 60m/s. WindSonic M features an IP66 rated, hard anodised aluminium construction with a heating option for cold environments. Both units are supplied with a 2 year warranty.

WindSonic will monitor wind speeds up to 0-60m/s (134mph) in a lightweight, corrosion-free polycarbonate housing and is particularly suited to marine/offshore (ships, data buoys) and land based installations.

- **Max Wind Speed**: 60m/s (134mph)
- **Construction**: Luran
- **Operational Temp**: -35°C to +70°C
- **Weight**: 0.5kg (18oz)
- **Heating Option**: None
- **Analogue Option**: 0.5V, 0-20mA or 4-20mA
- **Environmental**: IP66

WindSonic M, with an impact resistant, hard-anodised aluminium housing, will monitor wind speeds up to 60m/s (134mph). With an optional heating system providing enhanced performance at temperatures as low as -40°C, the sensor is particularly suited to harsher industrial conditions.

- **Wind Speed Range**: 60m/s (134mph)
- **Construction**: Aluminium
- **Operational Temp**: -40°C to +70°C
- **Weight**: 0.9kg (32oz)
- **Heating Option**: Standard Power
- **Analogue Option**: 0.5V, 0-20mA or 4-20mA
- **Environmental**: IP66, impact resistant to UL2218 Class 1
The Gill WindObserver and WindSonic range represent the very latest in wind speed and direction measurement technology.

Gill ultrasonic wind sensors are true solid-state devices and have no need for regular maintenance, making them the ideal choice for a wide range of applications, particularly those in hostile environments.
