

BRECObasic® - timing belts

Simple. Good. Reliable.

BRECObasic®:

- Represents the perfect alternative for simple tasks in transport technology
- Reduces costs thanks to standardised production
- Offers variety through special coatings
- Typical BRECO quality
- Made in Germany
- Simple, good, reliable - and grey!

BRECObasic®:

This name stands for our range of low-cost timing belts that has been especially designed for standard applications in transport technology. After all, not every timing belt always needs to meet the highest demands in terms of special durability requirements or tolerances. This gap is where the BRECObasic® range comes in. It goes without saying that all of these belts deliver the accustomed BRECO quality that guarantees problem-free and reliable production processes.

The range of available sizes and preconfigured products allows for countless potential applications, including inlet/outlet conveyors and destacking systems for glass panes or wood panels. Depending on the coating used, the potential fields of application can be widened to include general transportation tasks, even in wet areas. The Supergrip Basic coating is also available for inclined conveyors or elevating conveyor belts. If reduced friction is required for specific applications, the required effect can be achieved with an appropriate PAZ coating.

The belt types AT10 and T10 are available in widths ranging from 25 to 100 mm, either with fixed belt lengths or in welded designs.

BRECO is member of Mulco Europe EWIV

BRECObasic® - Simple. Good. Reliable.

Although you would not class BRECObasic® as a premium product, it is still sure to delight. We stake our reputation on it, and that is something you can also see in the current advertising campaign* for BRECObasic®. If you haven't seen it yet, simply head over to www.breco.de/dasisteinzigartig – after all, a picture really is often worth more than a thousand words.

**) Adverts to be placed 2012/13 in "motek daily", "Antriebstechnik" and "Konstruktionspraxis".*
